Mint Conversion Information

As UCU completes its digital banking upgrade, you will need to modify your QuickBooks Online settings

As UCU completes its digital banking upgrade, Mint aggregation services may be interrupted for up to 10 business days. Mint.com data is stored on Intuit cloud servers. Data is updated with every change and cannot restore data to a previous point in time.

For a successful account update, do not log into Mint.com until 10 business days after June 6, 2023.

During this time, the Mint.com server will automatically make the system conversion for your activated accounts. If you login into Mint.com during this time, you may see duplicate accounts, or an error displayed. Please do not attempt to change the status or make any changes in Mint.com during this time. After 10 business days, the accounts should be reconciled showing your transaction history available.

In the event that your accounts do not display current transactions after 10 business days, you may log back into Mint.com and click refresh to update the account. After the download is completed, click the Transactions tab to view up to 90 days of transaction history.
